

GaiaXus

Water quality monitoring systems
for citizen science & education

2024 at GaiaXus

Dear Friends,

2024 has been an incredible year for our small team at GaiaXus, and we want to close it by expressing our heartfelt gratitude to all of you. Your passion, vision, and commitment to making the planet a little better every day have been truly inspiring.

It's been a busy year! We launched our first product, the [Water Guardian](#), a sensor platform that is accurate for citizen scientists, easy to use, affordable and really cool (we think so, at least!). This came with our brand new App (on the PlayStore), that links to the Water Guardian and takes students through structured learning activities. And yes, the App works on Android phones, tablets and of course Chromebooks.

Along this journey, we were joined by two amazing interns, Jes Godinez and Dustin Pham, who added GIS and two new sensors, *DO* stay in touch, you'll be p(H)leased.... !

Looking ahead to 2025, we have big plans, we are now shipping systems nationwide and continue to support school pilots for free, connect with us if you want to try our system out for a few weeks!

Wishing you an amazing 2025 filled with passion and love for our only planet!

Warm regards,

The GaiaXus Team, Abigail, Caroline, Oksana, Jacob, Lee & Dietrich

Interested in bringing GaiaXus to your event,
classroom, or community? We would love to hear from you!
