Water quality monitoring systems  
for citizen science & education

## **Lake Erie STEM Field Day: Real Science, Real Impact**

We joined a group of dedicated middle and high school educators on Lake Erie for [two days of hands-on water quality monitoring](#). Organized by the **Leonard Gelfand STEM Center at Case Western Reserve University** and science educator **Shari Insley**—recipient of the 2024 Presidential Innovation Award—this event showcased the power of place-based environmental learning.

Together with educators, we used our **GaiaXus Water Guardians** to measure turbidity, temperature, conductivity, and more. It was an awesome demonstration of our systems from a boat, we even towed the sensors and generated GPS-coded water quality data. .

We're deeply grateful to **Jim Bader** and **Shari Insley** for their ongoing partnership and vision. Their support has shaped GaiaXus from the start and continues to guide our work in bringing real-world science to classrooms everywhere. And of course, the amazing educators in Ohio who shared their passion for the environment and teaching the next generation of scientists!

## Big news—we've been selected as a **Rally**

### **Fellow! Florida, here we come!**

**Rally** is a Orlando-based, nationally recognized accelerator for early-stage ventures working on real-world impact, and we're thrilled to be part of their Summer 2025 cohort.

This comes at the perfect time. **As we grow**, this fellowship gives us access to experienced mentors, a sharp support structure, and a **community** of founders who, like us, are building **solutions that matter**. It's a chance to push forward—with more clarity, more reach, and more impact.

We're also excited to spend time in **Central Florida, where STEM education and environmental science are thriving**. **Water plays a huge role** in life across the region, and we're looking forward to connecting with **educators, scientists, and community** leaders who might use our platform to strengthen local learning and stewardship.

Huge thanks to the Rally team for welcoming us in—we're ready to get to work.
